Over 8 years of experience

Our extensive experience in international freight transportation enables us to provide a high quality service based on in-depth knowledge, innovation and a flexible approach. We have successfully completed projects with clients all over the world, demonstrating high efficiency and guaranteeing safety and reliability at every stage of transport.

Highly qualified specialists

Our success in international freight transportation is due to our team of qualified specialists with in-depth knowledge and experience. We are constantly improving our skills to respond to changes in the industry and provide the best solutions for our customers.

Logistics and documents

We provide a full range of logistic services and promptly prepare the required documents for cargo - both for domestic and international transportation.

Multimodal Transportation

We integrate different modes of transportation - air, sea, land - into a single system, providing flexibility and efficiency. This approach not only reduces financial costs, but also ensures fast delivery of goods anywhere in the world.

Safety and security

The security of your freight is our priority. We strictly adhere to the highest security standards, ensuring that your cargo is fully protected at all stages of transportation.

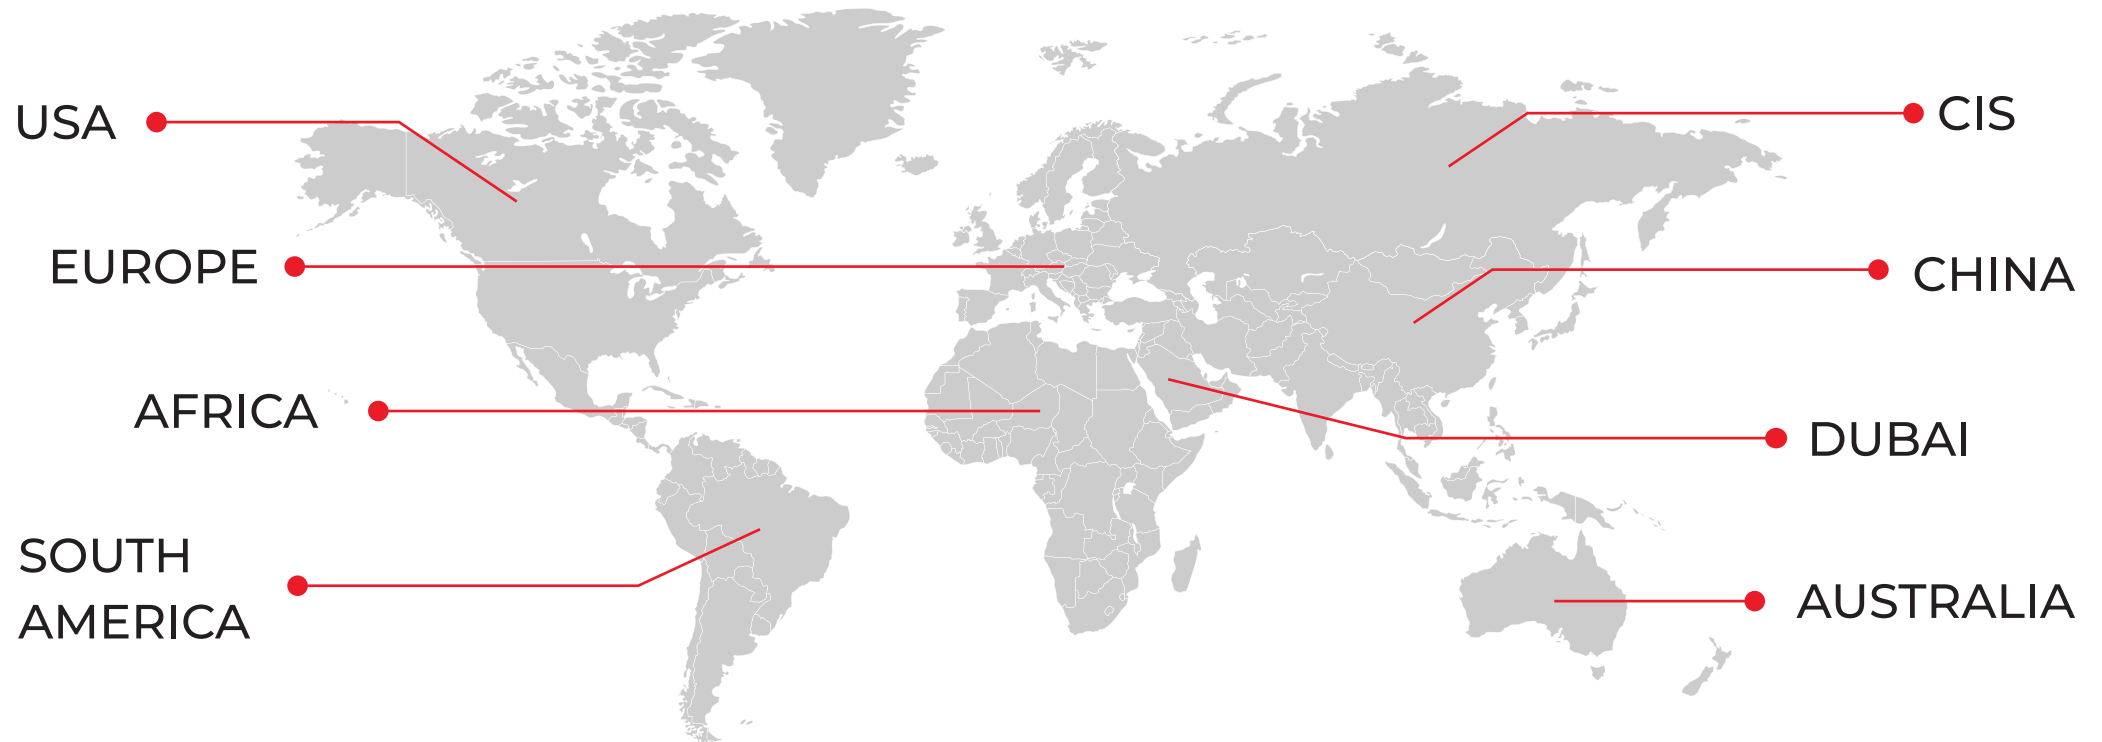

Eco solutions

Our company is actively moving towards environmental solutions in logistics and has added 12 modern electric trucks to its fleet, effectively reducing harmful emissions into the atmosphere.

LAND TRANSPORTATION

Land transportation for freight remains a leader in the shipping industry.

Land transportation provides flexible routes, transportation for any type of freight. Modern trucks are capable of transporting all types and volumes of freight, including hazardous and oversized cargo.

CIO Logistics is an expert in the organization of land transportation of freight, ensuring safety and efficiency in every delivery. We pay special attention to the individual characteristics of each freight.

Our qualified specialists develop optimal routes, prepare all necessary documents and guarantee delivery of the freight to the place and time agreed with the client.

SEA TRANSPORTATION

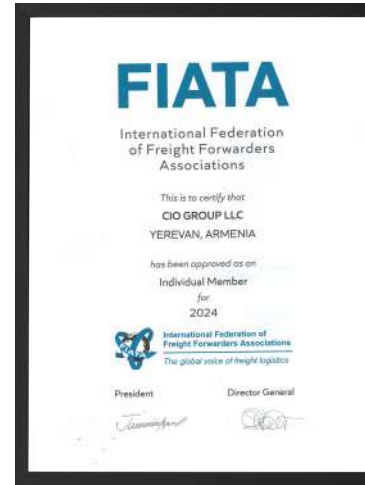

Sea transportation is cost-effective over long distances, which is why it is in demand in international commerce.

The loading and unloading process at the port is strictly controlled, which emphasises the reliability of container transportation. Various types of cargo, including voluminous and bulk cargo, can be safely transported by sea.

Thanks to its long experience in cooperation with sea lines and ports, CIO Logistics guarantees accuracy and adherence to delivery deadlines, providing its customers with a high level of service regardless of the geography of the transportation.
